EDUCATION

Indian Institute of Technology (IIT) Guwahati <i>Credit-Linked Data Science Program (via Masai School) – ML & Deep Learning</i>	Aug 2025 – Mar 2026 Guwahati, Assam
University of Lucknow <i>Bachelor of Computer Applications (BCA) – Information Technology</i>	Aug 2023 – May 2026 Lucknow, UP

EXPERIENCE

Full Stack Developer Intern <i>MCC Pvt Ltd</i>	Jan 2026 – Present Remote
- Engineered a high-throughput notification system delivering 300,000+ push notifications simultaneously with zero failures using queue-based architecture - Implemented Redis-based rate limiting on critical API endpoints, preventing abuse and ensuring performance under high traffic - Assisted in designing Role-Based Access Control (RBAC), enabling fine-grained permission management across multiple user roles and modules - Building full-stack features using MERN stack with TypeScript, React Native, and Vite integrating RESTful APIs with MySQL	
Full Stack Developer Intern <i>Edureka</i>	Dec 2023 – May 2024 Remote
- Developed full-stack Zomato clone using MERN stack with JWT auth, restaurant search, and order management - Implemented RESTful APIs and responsive React UI; collaborated in agile sprints to deliver optimized web applications - Built multiple projects (video streaming, weather app) demonstrating proficiency in JavaScript ES6+ and async programming	

PROJECTS

Classroom Monitoring System <i>Python, OpenCV, YOLO, Ultralytics, PyTorch, Deep Learning</i>	2025
- Engineered AI-powered system for real-time student attendance tracking and behavior analysis using YOLO object detection with 75%+ accuracy, reducing manual tracking effort by 85% - Trained custom deep learning model using Ultralytics/PyTorch on annotated classroom datasets; processed live video streams with OpenCV, NumPy, and Pandas to generate actionable insights and attendance reports - Designed modular pipeline for frame extraction, inference, and data logging – enabling easy integration into existing school management systems	
Full-Stack Zomato Application <i>React.js, Node.js, Express.js, MongoDB, JWT</i>	2024
- Built end-to-end food delivery platform featuring restaurant listings, smart search and filtering, cart management, and secure JWT-based user authentication - Architected RESTful APIs handling 1000+ concurrent requests; optimized MongoDB queries and implemented caching resulting in 40% faster page load times - Integrated third-party APIs for real-time location services and payment gateway simulation, demonstrating production-level full-stack development capabilities	

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, HTML5, CSS3, SQL
Frontend: React.js, React Native, Redux, Vite, Bootstrap, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Redis, RBAC, MongoDB, mongoose
Data Science & ML: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Ultralytics, YOLO, OpenCV
Machine Learning: Supervised/Unsupervised Learning, Deep Learning, Neural Networks, Model Training
Tools & Databases: Git, GitHub, Postman, VS Code, npm, Agile/Scrum, MongoDB, MySQL, DB Optimization

CERTIFICATIONS & ACHIEVEMENTS

Hackathon Finalist – "Hack with Uttar Pradesh": Selected as finalist among 500+ participants for innovative technical solution

IIT Guwahati Data Science Program: Admitted into prestigious credit-linked ML & Deep Learning program via Masai School

Full-Stack Development: Completed two internships building production-ready apps with measurable impact at scale (300K+ users)

AI/ML Innovation: Developed computer vision system achieving **75%+ accuracy** reducing manual tracking effort significantly

Rapid Technology Adoption: Mastered MERN stack, TypeScript, React Native, and Python ML ecosystem across 12 months
